

Setting for MacWise

The following settings can be used to setup MacWise for Premvet use.

Download the package and install it.

We would recommend you select macWise from the Application folder and 'Make an Alias', copy this alias to your desktop or copy to the dock.

Once MacWise starts up select the tabs:

Emulate	
Un-Tick Backspace = Del	
Function Keys Sets -> Double click 'SCO Ansi' keys from the finder window	
The International Character settings:

- 156 column screen
- 9-point font for 132 col mode
- ✓ 12-point font for 132 col mode
- Screen textwrap
- Next Window ⌘]
- Previous Window ⌘[
- ✓ MacWise Using Mac unix shell

Then Connections -> Telnet Connection -> Enter the name of your host. e.g.

If you are just connecting to one host, select Connections -> Open Connection on Startup

Finally select File -> Save Settings.
